

JUAN EULER

FrontEnd Developer

Location: Buenos Aires, Argentina

E-mail: juaneuler@hotmail.com

LinkedIn: <https://www.linkedin.com/in/juan-euler/>

Portfolio: <https://portfolio-juan-euler.netlify.app/>

PROFESSIONAL PROFILE

FrontEnd Developer specialized in React.js, Angular, and WordPress, with a strong focus on process automation through Python. I focus on creating high-performance, accessible interfaces and optimizing enterprise workflows within Adobe Experience Manager (AEM). I have solid experience integrating technical SEO, accessibility standards (A11y), and custom scripting to deliver scalable, data-driven solutions in high-demand international environments.

EXPERIENCE

VML – Marketing Agency

Tagging Analyst | April 2026 - Present

I serve as tagging analyst for digital analytics implementation across global properties for Colgate-Palmolive, including specialized divisions such as Hill's Vet and Hill's Pet. My role focuses on the full lifecycle of Google Tag Manager (GTM) containers, from the architecture and deployment of tags, triggers, and custom variables to the validation of the Data Layer to ensure precise user behavior tracking. I participate in QA and debugging processes in international environments, guaranteeing data integrity and tracking consistency before production deployment in highly complex digital ecosystems.

Authoring Site Analyst | August 2025 – March 2026

I served as a FrontEnd Developer for MetLife's EMEA division, managing and scaling digital assets within Adobe Experience Manager (AEM). My role involved end-to-end web management, from building sites from the ground up to implementing global components, interactive forms, and responsive email templates.

Beyond core development, I leveraged Python (Selenium & Pandas) to drive operational efficiency. I have designed and deployed custom web crawlers to automate site audits, manage mass redirection mapping, and process large datasets for document classification across international markets. Additionally, I led quality assurance efforts by auditing SEO and accessibility reports, coordinating technical resolutions between local markets and global infrastructure teams to ensure compliance and top-tier performance.

ADVERBUILD – Digital Marketing Agency

FrontEnd Developer (part time) | March 2025 – August 2025

I worked as a web developer at Adverbuilt, a digital agency focused on marketing campaigns. I built and maintained responsive landing pages, ensuring layout fidelity and cross-device compatibility. I also implemented key plugins in WordPress environments and collaborated with design and content teams to deliver optimized and user-friendly web experiences. I provided technical solutions aimed at improving performance and conversion rates.

CERTIFICATIONS

Google Analytics 4 (GA4) – 2026 – [Certificate](#)

Angular – 2025 – [Certificate](#)

WordPress (Elementor & WooCommerce) – 2025 – [Certificate](#)
